Dear Hackathon Festival Participants,

Thank you for registering for the [2026 Faculty of Engineering and IT Hackathon Festival](#). We are so excited to have you all as part of this year's Hackathon Festival and we all hope that it will be an invaluable and enjoyable experience for you.

Please read on below to get yourself ready for the Hackathon Festival.

1. Please ensure that you have registered on the Eventbrite event page so that we can ensure we can capture your details including catering and dietary requirements.
2. During the festival, you will be using Canvas LMS community – this has all things related to the Hackathon including program of events, information about the three days and more. We will be adding you to this Canvas community by Thursday 24th September, when you receive the invite, please ensure you accept as this will have all the different resources available.
3. Problem statements will not be released until after the opening ceremony.

4. There will be healthy lunch provided, but also please bring your own snacks and reusable water bottles and coffee cups. If we can reduce as much as single use waste as we can, let's be mindful and aim to reuse! 🗑️
5. Reminder to bring your laptop and chargers and any other supplies that you may need to work.
6. If social media is your thing – let's use the **#26feithackathonfestival** so that we can see what you are sharing with the world and repost your fabulous shots throughout the three days
7. On **29th of September** – you will receive your nametag and lanyard. PLEASE do not lose your nametag as this will help us identify you throughout the three days and you will have your free coffee vouchers attached to the nametag. The catered food will only be provided to people with their name tags.
8. Whilst it will be great if you could stay for the whole day throughout the three days, we also understand that you have other commitments, if you could ensure that at least 1-2 team members are present for the different activities and workshops, that will allow you to get the most out of the Hackathon Festival.

				16:30		End of Day					

PROJECTS

1. Teams will have 3 days in total to build their project, however, please remember that there is a shortlisting round where the top 12-15 teams will be selected to participate and present on the last day. There are no restrictions on what form it should take - product ideas, solutions, programming languages, or devices. It is an open-ended beginner friendly hackathon.
2. Teams must not work on any pre-existing project for the competition.
3. Teams must not commence any form of development or design work before the start of the competition. This includes, but not limited to, any code, graphics, audio, and 3D design work.
4. Teams may only build the project during the allocated time.
5. If you are coding, all your code must be published in a publicly accessible repository, with a link to the repository provided in your submission. All parts of your code must remain up for the entirety of the judging process.
6. Any third-party material used must be legally licensed and is available to the public to download or buy. You may purchase materials, tools and equipment for the competition, but at your own expense. You must list of all third-party material and APIs, including anything that was purchased, in your submission.

PRE SCREENING SUBMISSION REQUIREMENTS AND DEADLINE TUESDAY 30 SEPTEMBER 12:30PM

You will be submitting your pre-screening submission on Canvas LMS and the requirements are the below:

3 slides - Content for the Slide(s)/PDF

Slide 1: Project Overview

- Team Name, Project Title
- Problem Statement
- Summary of the Solution

Slide 2: Tech & Progress

- Tech Stack / Tools
- Current Status / What's Built So Far
- MVP plan (What they'll deliver by Day 3)

Slide 3 (Optional): Visuals / UI / Diagrams

- Mockups, wireframes, architecture diagram, or use-case flow

Please ensure that your project submission contains a submission title (we recommend using your project name + a simple tagline for this). No need to include individual team member names, **only team name.**
